

WebScanProd Vulnerability Assessment Report

Generated on: 2025-11-11 20:47:51

Executive Summary

Total Vulnerabilities Identified: 4
Critical: 1 | High: 1 | Medium: 1 | Low: 1
Overall Risk Score: 18/100

Detailed Vulnerability Findings

ID	Vulnerability	Severity	Affected URL	Description
VULN-001	SQL Injection	Critical	https://example.com/login	Unsanitized user input in login form allows SQL injection attacks
VULN-002	Cross-Site Scripting (XSS)	High	https://example.com/search	User input in search field not properly sanitized
VULN-003	Missing Security Headers	Medium	https://example.com/	X-Content-Type-Options and X-Frame-Options headers missing
VULN-004	Information Disclosure	Low	https://example.com/api/users	Server version disclosed in HTTP headers

Recommended Mitigation Steps

- VULN-001 - SQL Injection:** Use parameterized queries and input validation
- VULN-002 - Cross-Site Scripting (XSS):** Implement output encoding and Content Security Policy
- VULN-003 - Missing Security Headers:** Add security headers to server configuration
- VULN-004 - Information Disclosure:** Remove or obscure server version information
