

WebScanPro Security Assessment Report

Report Date: 2025-11-13 08:20 UTC
Total Findings: 4

Executive Summary

This report summarizes the security findings from the WebScanPro assessment conducted on November 13, 2025. The assessment identified 4 vulnerabilities across the target application.

Key Findings

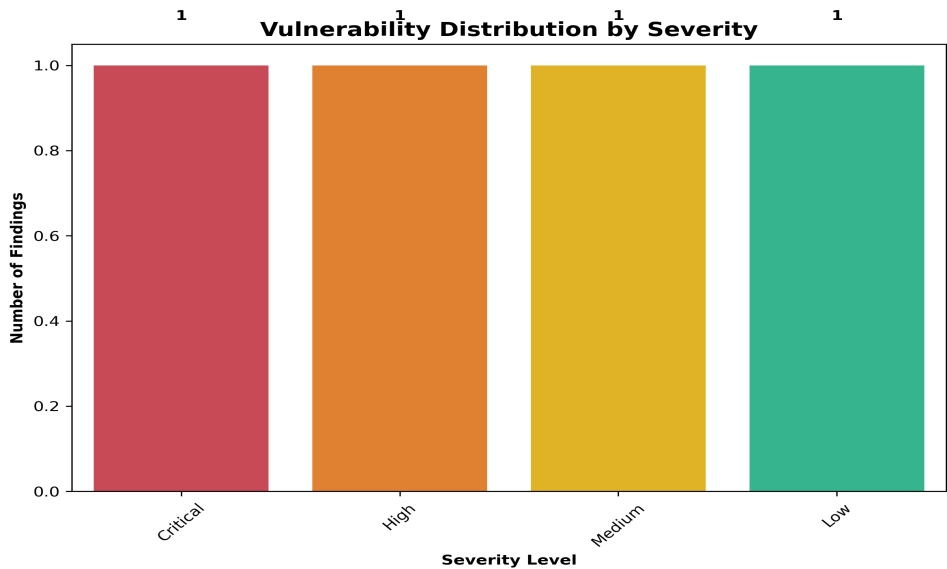

- Critical findings: 1
- High severity findings: 1
- Medium severity findings: 1
- Low severity findings: 1

Quick Statistics

Total Findings	4
Critical	1
High	1
Medium	1
Low	1

Recommendations

Based on the findings in this report, the following general recommendations are provided:

- Address Critical and High severity vulnerabilities immediately
- Implement secure coding practices and security training
- Establish regular security assessment cycles
- Implement proper input validation and output encoding
- Ensure proper authentication and session management
- Keep all components and dependencies up to date
